RAMI SARKEES

Medical Laboratory Scientist, MLS(ASCP)CM

PROFESSIONAL SUMMARY

Medical Laboratory Scientist with experience performing moderate- and high-complexity testing in clinical diagnostics, molecular testing, and blood banking. Skilled in specimen analysis and laboratory operations, ensuring accurate results, compliance, and quality patient care.

EXPERIENCE

Medical Lab Scientist II
Abrazo Healthcare | Glendale, AZ | Nov. 2025 – Jun. 2026

- Processed and analyzed blood, urine, CSF, vaginal, and other body fluid specimens, including microscopic evaluation of wet preps for *Trichomonas vaginalis*, yeast, and clue cells.
- Performed ABO/Rh typing, antibody screening/identification, fetal bleed, and Rhogam testing; maintained Ortho Vision® QC and documented results in Cerner LIS.
- Evaluated, verified, and reported laboratory findings in accordance with quality standards and turnaround times.
- Communicated critical results to healthcare providers to support patient care.
- Performed analyzer maintenance, calibration, and validation.
- Managed reagent inventory and lot-to-lot verification.

Medical Technologist
Havasu Regional Medical Center | Lake Havasu City, AZ | Apr. 2025 – Nov. 2025

- Performed clinical laboratory testing in chemistry, hematology/coagulation, urinalysis, microbiology, blood bank, and CLIA-waived procedures.
- Communicated critical laboratory results to healthcare providers, supporting timely patient care.
- Operated, maintained, calibrated, and troubleshot laboratory analyzers to ensure accurate testing.
- Processed, verified, and labeled patient specimens in compliance with quality standards.
- Entered and managed laboratory test orders and results in MedHost, ensuring accurate documentation and data integrity.
- Received and stocked laboratory supplies and reagents in approved storage units, documenting receipt, open, and expiration dates in accordance with laboratory protocols.

Front Desk/ Valet
Arizona Community Management Services, LLC | Phoenix, AZ | Sep. 2023 – Sep. 2024

- Managed resident requests, visitor access, and security procedures.
- Provided concierge, front desk, and valet services in a fast-paced residential environment.

Medical Laboratory Scientist Student Intern
AHN Saint Vincent Hospital | Erie, PA | Jul. 2022 – Jul. 2023

EDUCATION

Post-Degree Certificate
Medical Laboratory Science
Saint Vincent Hospital School of Medical Laboratory Science, Erie, PA

Completed 12-month clinical training in hematology/coagulation, chemistry, microbiology, immunohematology, urinalysis, and molecular diagnostics.
Jul. 2023

Bachelor of Science in General Science (Health Science Concentration)
Portland State University, Portland, OR

Interdisciplinary science degree focused on biology, chemistry, health sciences, laboratory methods, and scientific problem solving.
Jul. 2017

CERTIFICATIONS AND LICENSES

Medical Laboratory Scientist (ASCP)

LABORATORY AND TECHNICAL SKILLS

- Hematology & Coagulation
- Clinical Chemistry
- Immunohematology (Blood Bank)
- Microbiology & Urinalysis
- Molecular Diagnostics (qPCR, DNA/RNA Extraction)

- Performed clinical laboratory testing in hematology, coagulation, chemistry, immunology, microbiology, urinalysis, and transfusion services during a 12-month NAACLS-accredited clinical training program.
- Performed ABO/Rh typing, antibody screening, crossmatching, and pre-transfusion testing in the blood bank.
- Processed microbiology specimens, inoculated blood, urine, and fungal cultures, and evaluated culture growth following incubation.
- Interpreted laboratory results and identified abnormal findings under supervision.
- Operated automated and manual instrumentation, performed quality control procedures, and documented testing activities.
- Completed 200+ venipuncture and capillary collections while maintaining specimen integrity and patient safety.
- Prepared, calibrated, and verified reagents, controls, and testing materials.
- Adhered to laboratory safety, quality assurance, and infection-control standards.

Clinical Laboratory Specialist

Vitalant HLA Laboratories | Phoenix, AZ | Aug. 2021 – Jun. 2022

- Executed Luminex® Single Antigen (LSA) bead assays to detect and characterize anti-HLA antibodies, supporting transplant compatibility and donor-recipient matching.
- Evaluated molecular and antibody assay data to support accurate HLA testing, interpretation, and reporting.
- Operated, calibrated, maintained, and troubleshot QuantStudio™, EZ1®, Viaflo®, and Luminex® platforms to ensure reliable test performance.
- Processed and accessioned patient specimens while maintaining compliance with laboratory quality and regulatory standards.
- Managed reagent and supply inventories to support uninterrupted laboratory operations.

Molecular Technician

Sonora Quest Laboratories | Tempe, AZ | Apr. 2021 – Jun. 2021

- Received, logged, and accessioned patient specimens, verifying specimen integrity and completeness and supporting efficient laboratory operations through timely processing and accurate record maintenance.
- Aliquoted clinical specimens and prepared samples for testing while maintaining traceability and accurate documentation.
- Followed SOPs, aseptic techniques, and laboratory safety requirements to ensure specimen quality and testing accuracy.

Molecular Technician

Paradigm Laboratories | Phoenix, AZ | Jan. 2021 – Mar. 2021

- Executed DNA/RNA extraction and real-time PCR testing on clinical specimens, ensuring accurate molecular diagnostic results.
- Analyzed, verified, and documented PCR findings, including Ct values and quality control metrics.
- Operated and troubleshot KingFisher™ extraction systems and real-time PCR thermocyclers.
- Prepared reagents, controls, and specimens for molecular testing.
- Reported results through laboratory information systems (LIS), ensuring data integrity and traceability.
- Applied aseptic and contamination-control procedures while maintaining compliance with laboratory safety and regulatory standards.

- HLA Antibody Testing (Luminex® Assays)
- Quality Control & Quality Assurance
- Analyzer Calibration & Troubleshooting
- Laboratory Information Systems (Cerner, MedHost)

INTERPERSONAL AND PROFESSIONAL SKILLS

- Attention to Detail
- Analytical Thinking & Problem Solving
- Time Management
- Effective Communication
- Integrity & Professionalism
